ABOUT ME

Program Manager with 10 years of professional experience and 9+ years at Amazon, specializing in cross-functional program delivery, forecasting and variance analytics, agentic AI automation, process creation, and large-scale operations leadership. Proven success driving product launches, building governance frameworks and AI-driven mechanisms that remove manual work, and leading 200+ associates across geographies. Demonstrated ability to deliver in ambiguous, data-intensive environments while exceeding customer experience and operational KPIs.

ACHIEVEMENTS

- Built agentic AI mechanisms (20 Kiro agents + MCP) that automate the weekly variance deep dive, monthly CPR reporting, sprint management, and data refresh for DPWI RISC FIAT
- Own the weekly GP / GPSR / EMSA forecast-variance and RCA cycle in DPWI RISC FIAT — routing ranked deviations to named Ops POCs and closing RCAs every Friday
- Led end-to-end operational readiness for 5 product launches (Alexa+, AMU/Geet, ADWS, Calypso-JioHotstar) — coordinating across Product, Training, NLS, WFM, and CXM teams with zero missed launch dates
- Designed and implemented US Contact Segmentation mechanism across 5 functions — delivered ~98% execution success with zero callouts, now BAU governance
- Built D2AS-IND Asana Governance Framework from scratch — standardizing WBRs, project intake, and performance and action tracking site-wide
- As Launchpad OM (interim L5), managed 200+ associates, 10-12 TMs, 516K+ contacts — drove CPH 3.51 » 4.74, Occupancy 73.74% » 85.69%, Shrinkage 24.06% » 15.92%
- Designed and rolled out agentic AI Personas network-wide, driving 400 bps RAP and 300 bps CCXO improvement
- Created Employee Experience Premier League (EXPL) — achieving +218 bps schedule adherence, presented to Sr. LT for multi-site adoption
- Reduced Security Bar Raiser escalations from 10+ per month » 1 per month through systematic governance

WORK HISTORY

Amazon | Program Manager — DPWI RISC FIAT (Forecasting Insights & Analytics)

August 2026 – Present

- Own the weekly forecast-vs-actuals variance cycle for GP, GPSR, and EMSA regulatory-compliance functions — MAPE-deviation triggers, deep-dive RCAs with BA and Ops POCs, and RCA closure every Friday
- **Variance Deep Dive:** built a 7-stage multi-agent pipeline (Kiro + MCP) that pulls actuals and forecasts from fprdb, computes per-function wMAPE and ranked deviations, renders charts, and stages a review-ready Outlook draft routed to named Ops POCs; re-pointed it to function source tables after finding the roll-up dropped recent-week actuals
- **CPR Callouts:** automated the monthly CPR with a 5-agent crew (numbers » workbook write » evidence harvest » drafting » independent verification) that fails closed on any mismatch — prefills all 11 RISC programs from one dashboard pull, so each POC's monthly input is a two-cell review and the roll-up ties to the dashboard
- **Sprint Buddy:** built an AI companion for the RISC Taskei board (orchestrator + 4 specialist sub-agents, confirm-gated writes) to turn a 107-task backlog into a working sprint board; piloted with 3 users and now productizing it as a portable tool for any team
- **Data refresh:** replaced the manual weekly EMSA / GPSR WBR upload to S3 with a scheduled script (dry-run mode, kill switch) and co-built a Datanet pipeline feeding EMSA Website Audit actuals directly into fprdb
- Run these mechanisms unattended through a daily headless runner (Task Scheduler) backed by an automated test suite, alongside an Asana auto-updater and a twice-weekly board-health digest
- Own OP2 2027 forecasting for GP, GPSR, and EMSA and author inputs to the DPWI RISC Monthly Flash, CPR, and business/ops WBRs — coordinating across FIAT, Capacity Planning, Operations, and Program teams

Amazon | Technical Delivery Manager (Program Manager)

April 2026 – August 2026

- Owned end-to-end program delivery for product launches (Alexa+, AMU/Geet, ADWS, Calypso-JioHotstar) — managing cross-functional coordination across Product, Training, NLS, WFM, and Capacity Planning teams
- Built Asana governance framework from scratch — standardizing project intake, WBR cadence, performance tracking, and escalation management for D2AS-IND
- Served as Ops POC for Alexa+ launch — identified critical gaps (Lisa feature on EI skills), drove resolution with Product teams, established daily war room governance

- Managed and improved Fix IT/Gemba governance — systematic defect identification, RCA write-ups, SLA-based resolution tracking (48 hrs quick fix, 1-4 weeks complex)
- Led CS Listening Sessions for UK marketplace — translating customer escalation patterns into actionable insights for product and operations teams

Amazon | Operations Manager (Launchpad OM — Interim L5) » Team Manager
August 2024 – March 2026

- Led multi-site D2AS Technical Customer Service operations across geographies, overseeing 200+ associates and 10-12 Team Managers (Aug 2024 – Aug 2025)
- Drove operational excellence across 516K+ customer interactions — RAP +3.8%, CCXO Top Box +2.6%, Bottom Box -2.3%, ACHT 9:54 (benchmark 10:52), HRR 118.73%
- Served as D2AS-IND Sites Peak Captain (Peak 2024), delivering site-level service goals through initiatives like EXPL program execution
- Designed and rolled out Cedric Personas (Jan 2025), driving 400 bps RAP and 300 bps CCXO improvement network-wide
- Maintained Perfect Pay defect rate at 0.71% (2024) and 0.58% (2025) through cross-functional payroll partnerships
- Built SEEC 2.0 framework consolidating multiple feedback channels; drove self-service bot implementation reducing contacts by 1,000/quarter
- Designed US Contact Segmentation mechanism coordinating WFM, CP, Training, CXM, and Operations — delivering ~98% success on immovable timelines

Amazon | Team Manager
September 2021 – July 2024

- Managed team of 29 associates (UK marketplace) — exceeding benchmarks: RAP 74.81%, CCXO 86.06%, ACHT 9:44 (benchmark 11:03), HRR 118.89%
- Built RTM dashboards driving Missed Live% from 5.62% » 2.79%, Occupancy 68.22% » 77.92%
- Coached and developed high-performing teams — coaching satisfaction 4.93/5, Inclusion 83%

Amazon | Technical Support Associate » Advanced Technician » Process Trainer
April 2017 – August 2021

- Progressed from TCA to Advanced Technician supporting Amazon devices (Echo, Fire TV, Kindle, Alexa); promoted to SME within 6 months and led a productivity initiative reducing CHT by 2 minutes
- As Process Trainer: delivered onboarding for 20+ new-hire cohorts, achieving 4.9/5 training feedback

SKILLS

Program Management	Operations, Analytics & AI	People & Communication
Cross-functional Program Delivery	Forecasting & Variance Analysis (wMAPE)	Stakeholder Management
Process Design & Governance	Data-driven Analysis (Excel, Tableau, QuickSight)	Executive Communication
Launch Coordination & Readiness	KPI Management & Dashboards	People Leadership (200+)
Workforce & Capacity Planning	Agentic AI (Kiro, MCP, Multi-agent Design)	Change Management
Goal Planning & Risk Mitigation	Automation (PowerShell, Python, SQL)	Mentoring & Development
Mechanism Building & Automation	Amazon Q / QuickSuite / Asana / Taskei	Collaboration

CERTIFICATIONS & LEARNING

- **AWS AI Business Specialist** — Certification | **Lean Six Sigma** — Yellow Belt
- **Amazon Machine Learning University (MLU)** — Agentic AI Applications: From Concept to Code
- **Amazon Machine Learning University (MLU)** — Advancing Reasoning in AI Systems

EDUCATION

2011–2015 **Bachelor of Engineering (ECE)** — Brindavan College | Graduated with Distinction: 72.1% | Best Student of ECE Branch, 1st Year

2010–2011 **Kendriya Vidyalaya** — HSC | Final Grade: 87.2%

2008–2009 **Kendriya Vidyalaya** — SSC | Final Grade: 90.8%

VOLUNTEERING

Active participant in Amazon Community Impact (ACI) initiatives including Sensory Wonders, Tiny Treats, Rolling the Chairs, and Superheroes Save Lives.
